

```
from sys import argv
```

```
result = f"{argv[1]} is a palindrome." if (  
    str(argv[1]).replace(" ", "").lower() ==  
    str(argv[1]).replace(" ", "").lower()  
    [::-1])else f"{argv[1]} is not a palindrome."
```

```
print('\n' + 'Output: ' + result + '\n')
```

Output: 11 is a palindrome.
